Opportunity: z/OS Systems Programmer

Global Technology Solutions Group (GTSG) is a 35-year-old consulting services company focused on Mainframe systems since our inception.

We are seeking experienced z/OS Systems Programmers with installation and support experience with z/OS operating system and related IBM and ISV products. We are looking for subject matter experts to assist us with numerous projects from steady-state support to specific projects, including ISV software migrations and performance and workload management engagements.

We are looking for subject matter experts with the following skills and experience:

- z/OS operating system support - installation, maintenance, configuration and troubleshooting
- Broad ISV and IBM Program Product support - installation, maintenance, configuration and troubleshooting
- Advanced knowledge of SMP/E
- Understanding of the capabilities and configuration specifics of IBM and ISV products and experience in replacing an ISV product with an IBM equivalent
- Database & Data communications - DB2, IMS, CICS, VTAM/TCPIP
- Experience with performance management
- REXX programming

At the present time, all activities are remote and unlikely to change. Compensation based on experience, architecture & leadership skills among other factors.
